The World Road Association (PIARC)

Association
mondiale
de la Route

World Road
Association

A non-profit association founded in 1909 to promote international cooperation in issues related to roads and road transport

Association
mondiale
de la Route

World Road
Association

Members

105 Member Governments

4 Regional Authorities

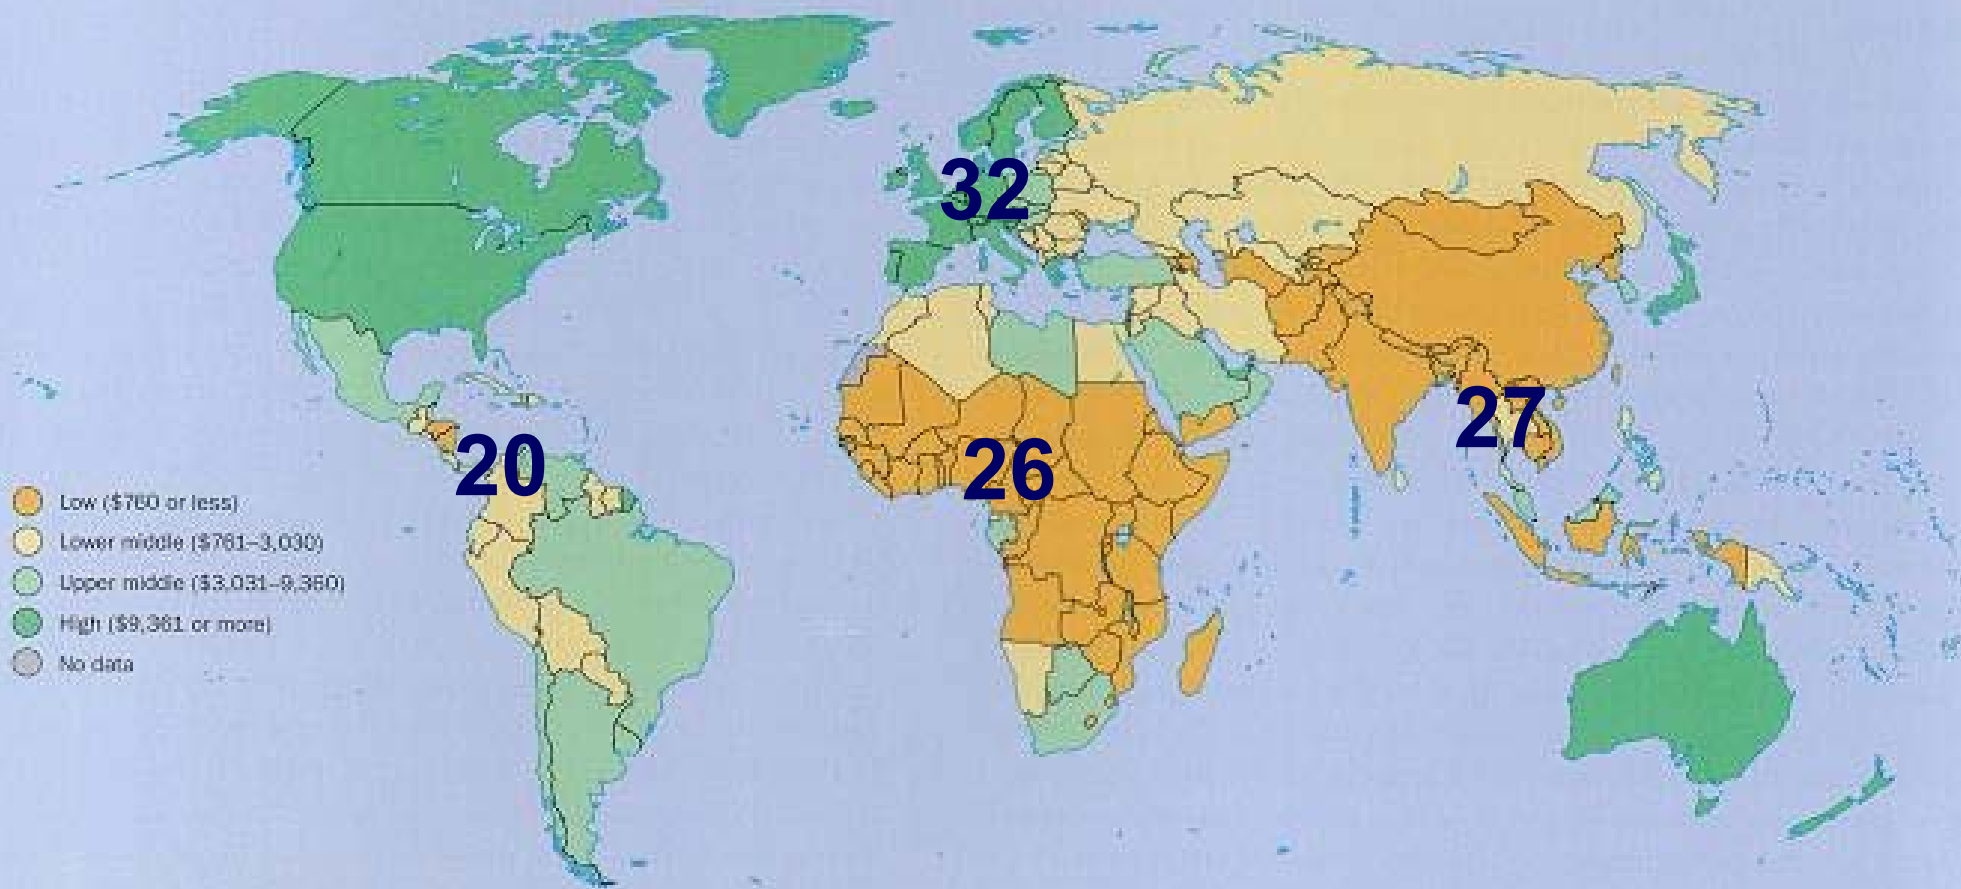

> 600 Collective Members

> 1000 Individual Members

in about 130 Countries

PIARC Member Countries

Association
mondiale
de la Route

World Road
Association

Vision

PIARC will be the World leader
in providing information on
roads
and road transport policy
and practices
within an integrated
sustainable transport context.

Association
mondiale
de la Route

World Road
Association

Mission

To serve all members

- by being a leading international forum
- by disseminating best practice
- by promoting efficient tools for decision making

with special emphasis for
developing countries and
countries in transition

Association
mondiale
de la Route

World Road
Association

Structure

COUNCIL

representation of all
member countries

EXECUTIVE COMMITTEE

elected by the Council
every four years

GENERAL SECRETARIAT

NATIONAL COMMITTEES

Association
mondiale
de la Route

World Road
Association

Activities

- Sets up Committees and Develop Projects,
- Publishes Documents and Software,
- Co-operates with International Bodies,
- Organizes Winter Road Congresses
- Organizes World Road Congresses

MEMORANDUM TO PUBLIC CONSULTATION AND COPIES

Road Technology
CI Subsoil Characteristics
CI Covered Roads
CI Flexible Roads
CI Earthquake, Damage, Subgrade

CI Surface Characteristics

Publication
The 11th South Symposium on Road and Airfield Pavement Surface Characteristics was held in Pretoria on June 2, 1999. The one hundred page proceedings include the ten highest technical papers that were presented in on display at about 80%.

Recent International Equipment

The equipment parts of PAVIC 4000, the international project to compare and harmonize the evaluation

of One of the key objectives of the Committee College of Road-Materials of Mexico-Miranda.

Technical sessions organized by CI In Kuala Lumpur the main session of the Committee will be devoted to the 8th International Symposium (summers) on the development of indexes related to the service level of roads. The results of surface distress for road management systems and the effects of vibrations from heavy vehicles on the surroundings.

In addition to the 11th International Symposium, a session on measurement devices and harmonization regarding road resistance and roughness will be organized.

Auditor sessions on noise nuisance (hazardous roads) will also take place. CI will participate in the workshop organized on Airfield Pavements in co-operation with CI and CA.
